I am going to visit the video game exhibit at The Strong.

I will go with my adult up the stairs or we will take an elevator to the second floor.

The games make noise and have bright lights. Some games are in a dark room. Other games are in brighter spaces. My adult will take me to play the games I like best.

I will need a token for some games. I will ask my adult if we can buy tokens. If we do not buy tokens, there are still other video games to play.
The exhibit has a game floor that lights up. Many children like to play on this floor. I can take a turn and play, too.

The exhibit also has display cases filled with interesting things.

The video game exhibit is exciting. If the lights or noises bother me, I will ask my adult to take me out. I will not leave the video game exhibit without my adult.

I will have fun at the museum!
